

MAINTENANCE

Periodic Maintenance Chart for Australia

NOTE: This chart replaces the previous maintenance chart Version 25062013

WARNING

Always remove the spark plug caps from the spark plugs when servicing the engine to prevent accidental starting.

Comment

- The service intervals can be used as a guide. Service more frequently under severe, hot, dry or dusty conditions.
- Engine oil may need to be changed earlier than service schedule. Refer to Oil Manufacturers' Specifications.

D = Service more frequently under hot, dry or dusty conditions

K = Service to be performed by an Authorised Kawasaki Dealer.

WARNING

Replace paper air filter elements when dirty. DO NOT blow out paper elements with compressed air. This causes the fibres to separate and allows dust ingestion into the engine.

MAINTENANCE	INTERVAL				
	Daily	First 8 hrs	Every 50 hrs	Every 100 hrs	Every 200 hrs
Check and add engine oil	X				
Check for loose or lost nuts and screws	X				
Check for fuel or oil leakage	X				
Check battery electrolyte level	X				
(D) Check or clean air inlet screen	X				
(D) Clean foam pre-filter	X				
(D) Replace air cleaner paper element				X	
Remove inspection plates and clean debris			X		
(D)(K) Clean dust and debris from cylinder and cylinder head fins				X D	
Tighten nuts and screws				X	
Change engine oil		X	X D		
Replace spark plug(s)				X	
Change oil filter			X		
(K) Check and adjust valve clearance			X K (first 50 hr)		X K
Replace fuel filter				X
